

SIG FCSN working groups

ICT.Open 2023 Spring Meet-up

Animesh Trivedi, Ana-Lucia Varbanescu,
Paola Grosso, Fernando Kuipers, Alexandru Iosup

... with ideas from the entire FCSN community!

Working Groups and Themes

WG - Research

Objectives

- **Identify** and **develop** the research themes for coming 12-18 months

Members

- Join if you are interested to work **collaboratively** on these ideas

Deliverables/Roadmaps:

- Systematic surveys
- Position papers
- Workshop organization
- Pitches for industry

WG - Funding instruments

Objective

- Strategic actions and coordination toward funding for the community
- Collect funding instruments and requirements
- Facilitate collaboration/coalition forming for such instruments

Members

- Join if you want to collaborate in collecting (and potentially influencing) funding, also with NWO, TNO, SURF, NLeSC, European-level organization, etc.

Deliverables

- Guidelines and best practices documentation
- Project instruments calendar and ideas
- Policy collaboration
- Who is who connections

WG - Education

Objective

- Collect curriculum information and materials for CSN education
- Collect education best practices in CSN education
- Propose joint entry level and/or graduate CSN courses

Members

- Join if you want to work on curriculum analysis, course collection
- Join if you want to work on designing a CSN course (introductory and/or advanced)

Deliverables

- State-of-practice in national CSN education
- Ideas for CSN themes of interest for new courses
- CSN support for education tools and methods, especially for joined labs and education infrastructure

WG - Industry collaboration and further engagement

Objective

- Facilitate a who's who platform
- Design and implement mechanisms for dialog and collaboration

Members

- Join if you want to connect with industry and brainstorm on joint projects, funding proposals, research, etc.

Deliverables

- Landscape of FCSN industry
- Collaboration platform

WG - ICT Infrastructure for Reproducible Experimental Sciences

Objective

- Collect information about ICT infrastructure for reproducible experiments across sciences
- Propose “ICT infrastructure” plan for each NWO and similar proposal
- Coordinate for national-scale ICT infrastructure for reproducible experimental sciences

Members

- Join if you are interested in discussing the design and implementation of large-scale research infrastructure

Deliverables

- Opportunities for translational research with other sciences and also with various industries
- Parts dedicated/with priority/at least with equal rights to CSN Research (think DAS or Do IoT Fieldlab, our own “microscopes” or “telescopes”)
- Inventory of common/shareable research infrastructure
- A working protocol with CSN Research Infrastructure
